

STAY SAFE ON THE FARM

Put a biosecurity plan in place to stop harmful germs from spreading on your farm.

- Develop a written biosecurity plan and train essential workers on the plan
- Restrict entry to farm sites with barriers
- Use an entry logbook to record visitors
- Keep deliveries away from animal areas
- Limit access to essential farm personnel
- Clean/disinfect vehicles and equipment
- Wear clean clothes and boots when working with animals

- Quarantine new animals on arrival
- Dispose of dead animals properly
- Remove manure promptly and handle according to regulatory requirements
- Control rodent and fly populations
- Prevent wildlife from coming in contact with animals
- Clean up feed spills immediately
